

dear reality,

## Dear Reality,

is a 3D Audio technology software company and has grown considerably through a strong agile practice. Founded in 2014 and based in Düsseldorf, we are committed to deliver high-quality, cutting-edge 3D audio technology, software tools and VR & AR experiences. Our dearVR technology is already available for Unity and as a VST/AAX/AU plugin for Digital Audio Workstations.

We are starting 2018 by expanding our 3D audio technology development through cooperation with Sennheiser Pro Audio.

We are looking for a

## Freelance UX/UI Designer for VR & AR (f/m)

working on a new dearVR software tool to enable mixing 3D audio in VR & AR.

### Your tasks:

- Designing innovative user experiences for 3D applications
- Support development team in the creation of dearVR UI
- Close collaboration with our programmer and audio team

### Your qualification:

- Understanding of form and creation in 3D space and be well-versed in related 3D-tools.
- Strong sense for usability and an empathic understanding of user experiences.
- Knowledge how to work with Unity game engine.
- Be well-versed with 2D-tools, too (Photoshop, Indesign, Illustrator, etc.)
- Self-motivation, good communication skills
- Ability working and knowledge exchange in small teams
- Interest in VR & AR
