

dear reality,

Dear Reality,

is a 3D Audio technology software company and has grown considerably through a strong agile practice. Founded in 2014 and based in Düsseldorf, we are committed to deliver high-quality, cutting-edge 3D audio technology, software tools and VR & AR experiences. Our dearVR technology (please see www.dearvr.com) is already available for Unity and as a VST/AAX/AU plugin for Digital Audio Workstations.

We are starting 2018 by expanding our 3D audio technology development through cooperation with Sennheiser Pro Audio.

In order to continue delivering highly qualitative and innovative mixing workflows & tools, we are looking for a

Unity 3D Developer (f/m)

This position will be full-time and located at Dear Reality, Düsseldorf (Germany).

As a Unity Developer you will design, implement and ensure the proper functioning of new dearVR software products.

Your tasks:

- Develop new tools for 3D Audio production in collaboration with our domain experts, technical artists and other programmers
- Optimize our current pallet of products
- Test, debug and fix issues in dearVR powered products as they arise
- Document the work to enable artists and programmer to understand how our systems work

Your qualification:

- 2+ years' programming experience with Unity3D
- Good knowledge of the C# language
- Very good knowledge of 3D mathematics
- Self-motivation, good communication skills
- Proactive and team oriented personality
